

Don't just clean it. **clinell**® it.

Safer workplaces. Safer staff.

Clinell is trusted by 9
out of 10 NHS hospitals

Kills 99.99% of viruses
and bacteria

Dermatologically tested
and skin friendly

Safeguard hands and surfaces

Our Clinell Antimicrobial Hand and Surface Wipes kill up to 10x more bacteria and viruses than standard hand sanitisers or household disinfectants.

Clinell Antimicrobial Hand and Surface Wipes are developed from the patented formulation of our Clinell Universal Wipes – the NHS' number 1 surface disinfectant wipe¹. They also clean whilst they disinfect, meaning that, unlike alcohol-based hand sanitisers, Clinell Antimicrobial Hand and Surface Wipes are effective on clean or dirty hands².

The COVID-19 virus can survive on surfaces up to 28 days². From there it contaminates our hands, spreads to other surfaces and causes infection. Without proper surface disinfection and hygiene, we put ourselves, our colleagues and others at risk.

Thankfully, improved hand hygiene, coupled with better surface decontamination, reduces the risk of being colonised by viruses⁴ and reduces the risk of a respiratory virus infection between 58.9 and 87.8%⁵. Together, they're one of the most effective steps we can take to keep ourselves safe.

✓ The Health and Safety Executive (HSE)

Providing hand hygiene solutions is a critical obligation for employers. The UK's Health and Safety Executive dictates that employers must provide hand washing facilities, sanitising stations and educational signage⁶.

Equally, they dictate that employers must ensure "thorough cleaning of all frequently touched surfaces at least once per day"⁷ – ideally after each use. In practicality, that means effective hand hygiene and surface decontamination products should be available in every workplace and every shared vehicle.

✓ A trusted partner

Education & support is just as important as the products you choose. Thanks to more than a decade as a trusted supplier to the NHS, we specialise in exceptional aftercare. Our experienced Clinical Directors and in-house Creative Studio produce materials to help you protect your staff, safeguard your business and comply with HSE.

✓ Wipe away the risk

Clinell products offer unbeatable infection prevention, that's why they're trusted by 9 out of 10 NHS hospitals¹. Clinell Antimicrobial Hand and Surface Wipes offer a two-in-one solution for safer surfaces and more hygienic hands. They're proven to kill 99.99% of bacteria and viruses by independent, third-party labs – up to 10x more than household disinfectants and hand sanitisers.

Effective Against	Test	Time
Bacteria	EN13727	10 sec
Bacteria	EN16615	30 sec
Fungi	EN13624	10 sec
Mycobacteria	EN14348	10 sec
Enveloped Viruses	EN14476	30 sec
